

BOREBAG

- Heat-sealed bag that protects the equipment from humidity and environmental conditions.
- It is the ideal solution for protecting and preserving products over long periods of time, during which the conditions inside the packaging must remain constant to prevent material deterioration.
- Allows visual inspection of the equipment.
- Extends the equipment's inspection interval to 10 years from the packaging date.
- An annual inspection of the packaging is required, which does not require specific training.
